About the Education Program

- This professional college is headed by a dean who reports to the provost. The College of Education has primary responsibility for the administration, development, maintenance, and evaluation of professional education programs at Southeast. The College of Education participates in the cooperative doctorate in educational leadership with the University of Missouri-Columbia. There are articulation agreements with 13 community colleges, and the undergraduate teacher education program is delivered at Jefferson College, Three Rivers Community College, and the Bootheel Education Center in Malden.

- Practical Experience Requirements for Education Majors

Field experiences continue to be a significant component of all professional education programs. From Block I to Block IV of all undergraduate programs, students engage in increasingly complex activities, from observing and assisting a teacher a few hours a week to student teaching all day for 14 weeks. These experiences are integrated with coursework in each block and are conducted under the collaborative supervision of university faculty members and school teachers. Since 1994, the College of Education has increased its emphasis on diverse field experiences in undergraduate programs. In the four blocks, faculty members and the Office of Field Experiences place teacher education students in rural and urban schools with pupils from various socioeconomic, cultural and racial groups.

Source: Southeast Missouri State University, May 1999

- **Professional Development School(s)**

The most recent development in the field experiences offered in teacher education is the establishment of a professional development school project. Students can have practical experience in professional development school sites in the areas of early childhood, elementary, special, and middle-level education. Secondary education majors participate in the extensive block program with field experiences at various school sites.

Source: Southeast Missouri State University, May 1999

- **Co-curricular Programs**

Teacher education students can participate in the following organizations: Kappa Delta Pi, Marva Collins Education Club, Dance Club, Physical Education Majors Club, Student Council for Exceptional Children, Student Missouri State Teacher's Association, Southeast Missouri Council of the International Reading Association, Student National Education Association, and Student Chapter of World Council for Curriculum and Instruction.

Source: Southeast Missouri State University, May 1999

- **Instructional Technology Requirements**

The infusion of technology continues to be a major emphasis within the teacher education program. The International Society for Technology in Education standards are met programmatically. The use of technology is an integral component of instruction across all departments. In addition, all education majors are required to take EM 102 Technology and the Teacher's Role.
